1. Measure Pitch

Divide the distance between three rivets (centre to centre) by two to obtain the pitch of the chain.

.325" = 8.25mm

3/8" = 9.25mm

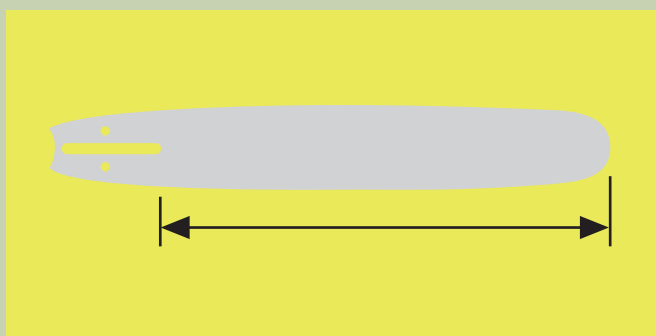

2. Measure Gauge

Measure the thickness of the drive link using callipers.

0.43" = 1.1mm

0.50" = 1.3mm

0.63" = 1.5mm

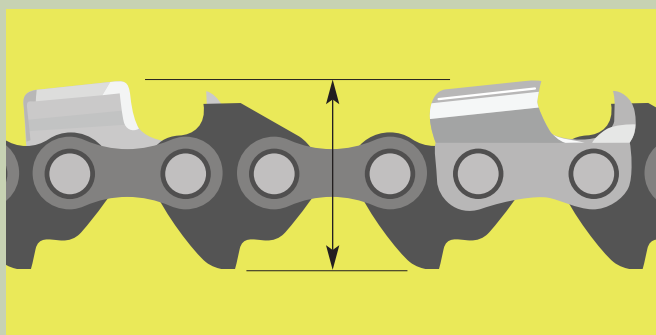

3. Measure Bar Length

Measure from end of mount slot to bar tip to get bar length (cutting length).

4. Drive Links

Count the total number of drive links to obtain the length of the chain.

5. Measure Profile

Measure from top of saw chain to bottom of drive link.

3/8LP = 16mm

3/8 = 19mm
